We carried out a Stock Condition Survey in 2021. JMP stratified the stock into property types using construction date and type. A 20% sample size was surveyed of each strata type within each geographical area to ensure a representative sample. This either confirmed current LCC and planned maintenance programme or highlighted areas for additional checks/action. We carry out continuous assessment of our stock and capture site data through an ongoing combination of inspection at void and during access to carry out planned maintenance programmes. Our Senior Clerk of Works carries out an annual in house survey and assessment of non standard elements in our stock.

Indicator 21 The average was increased significantly due to eight adaptations totalling 730 days to complete due to- covid (1), - stage 3 contractor going into liquidation (4), -receipt of AD1 for prospective tenants while awaiting delayed handover of newbuild development (3). The remaining 38 adaptations took 706 days in total, an average of 18.58days).

SHQS Indicator 9.2 Our uninhabitable stock acquired for Orchard Street CTI development scheme has increased in 2021.22. These are classed as cloned EESSH fails and SHQS fails which we have put into the exemption column. We have included these in projections for 2022.23 as we have no site start date yet.

Other fails-we had 10 fails on 5 year electrical certificates due to covid, rigged meters, and hoarding all of which required either a delay or taking further action by PHA which took the properties over the 31/3/22 deadline.

Comments (Getting good value from rents and service charges)

Ind 27 we were awaiting our Tenant Grant Fund Payt from LA which wasn't paid until late April and was to mitigate rent arrears accrued during first lockdown in 2020 - 2021. Had this payment came in during 21/22 as due this would have reduced our arrears by £18500 to 2.69%
